TECHNICAL SKILLS

Cloud & Infrastructure: AWS (Lambda, S3, EC2, DynamoDB, API Gateway, IAM, CloudFront, CloudWatch), Terraform, Infrastructure as Code (IaC), AWS CLI

DevOps & Automation: GitHub Actions (CI/CD), Git, Docker, Kubernetes (AKS/EKS basics), OIDC, Monitoring/Logging, Automated Testing, Security Best Practices, Least-Privilege IAM

Programming & Databases: Python, JavaScript/TypeScript, Node.js, Bash, SQL, REST APIs, Express.js, Vue.js, React, MongoDB, MySQL, DynamoDB, Serverless Architecture

Certifications: AWS Certified Cloud Practitioner, AWS Solutions Architect Associate (In Progress)

RELEVANT EXPERIENCE

Klein Consulting d/b/a Southeast Hypnosis

Houston, TX

Automation Engineer (Digital Transformation)

September 2021 – December 2024

- Architected and deployed automated scheduling, intake, and reminder workflows through a white-labeled CRM/automation platform with web-hook integrations, reducing manual administrative workload and lowering client no-show rates.
- Integrated AI-powered chat-bot and lead-nurture sequences to qualify inbound traffic, automate follow-up communication, and improve conversion of prospective clients into booked appointments.
- Migrated corporate website from SiteGrounds to optimized WordPress infrastructure with caching, CDN integration, and database tuning, improving load times, up-time, and user experience.

Office Manager

March 2020 – September 2021

- Managed daily front-office operations including scheduling, client communications, records, documentation, billing, and intake processes, while ensuring confidentiality and operational accuracy.
- Collaborated directly with ownership on business operations, identifying repetitive bottlenecks and improvements to improved lead generation, collection, and response times.

PROJECTS

Serverless Portfolio Website | Live | *AWS, Terraform, CI/CD, Astro, TailWindCSS, TypeScript* September 2025 – November 2025

- Architected and deployed multi-account AWS infrastructure (2 OUs: production/test) with MFA-enforced root account, environment isolation, and cost governance alerts, demonstrating cloud-native best practices.
- Implemented end-to-end CI/CD pipelines using GitHub Actions with OIDC authentication, automated testing (Playwright and Gripe), Terraform IaC deployments, and CloudFront invalidation for zero-downtime releases.
- Built serverless backend with AWS Lambda, API Gateway, and DynamoDB to track visitor analytics with less than 100ms latency and high reliability, ensuring scalability for production workloads.
- Applied security and compliance best practices including IAM least-privilege policies, S3 bucket hardening (versioning, AES-256 encryption, OAC-only access), and lifecycle rules for cost optimization.

Innov8 Barber Shop Management Platform | *Vue.js, Node.js, Express.js, MySQL, AWS*

January 2025 – April 2025

- Coordinated delivery of a full-stack scheduling and customer management platform for a local barbershop, aligning scope, timelines, and stakeholder requirements to replace manual appointment and client tracking processes.
- Led Agile ceremonies, status reporting, and cross-functional collaboration across front-end, backend, database, and architecture teams, helping keep milestones on track from planning through final presentation.
- Translated business needs into technical artifacts including requirements traceability, workflow diagrams, risk logs, and testing documentation, improving communication between stakeholders and developers while supporting a successful project presentation.

EDUCATION

University of Houston

Houston, TX

Bachelor of Science in Computer Information Systems

August 2020 – May 2025

VOLUNTEERING

Community Business Ambassador

November 2021 – May 2024

Greater Business of Pearland

Houston, TX

- Analyzed engagement data from 1,500+ participants using Microsoft Excel to inform outreach strategies, delivering 3,000+ increase in event attendance through data-driven targeting and community partnerships.
